

## Setting Up Your GTMC.NET email account on MacBook Pro

Here are the basic settings for setting up a @gtmc.net email account. Not all settings apply to all email programs or mobile devices. If these options do not work, please contact the business office. Thanks

### Incoming Mail Server: IMAP or (POP3)

Host Name: mail.gtmc.net

User Name: Entire email address (ex. email@gtmc.net)

Password: Enter your email password

Server Port: 143 or (110)

Use SSL: NO

### Outgoing Mail Server:

Host Name: smtp3.gtmc.net

User Name: Entire email address (ex. email@gtmc.net)

Password: Enter your email password

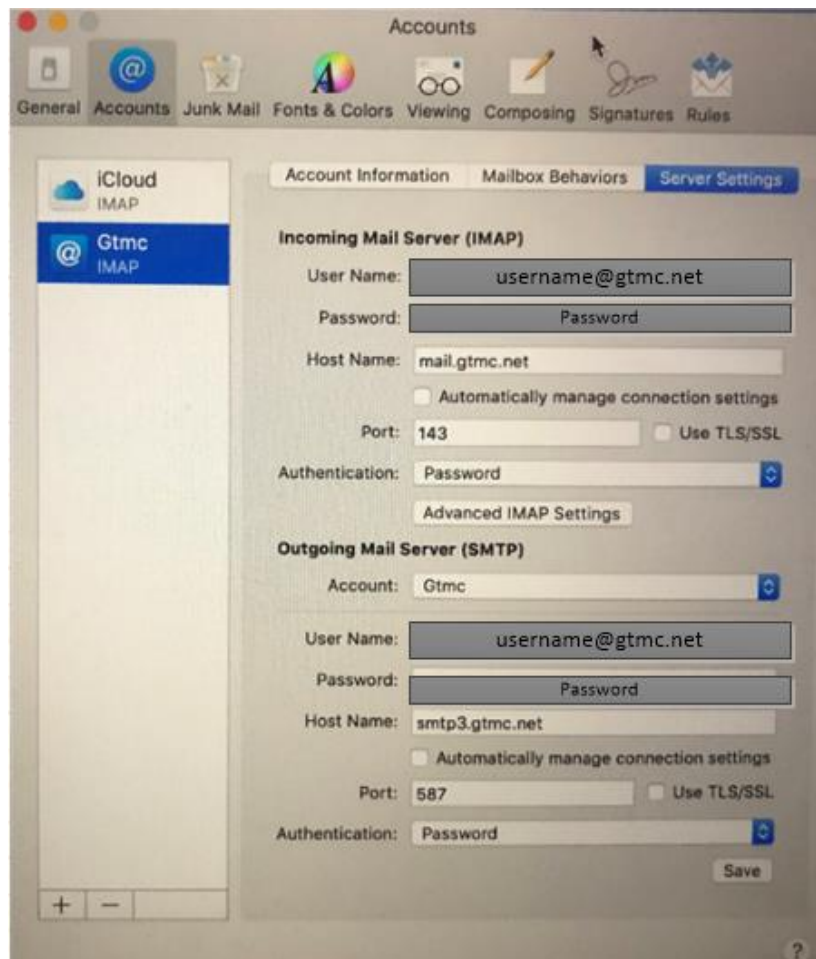

Use SSL: NO

Server Port: 587

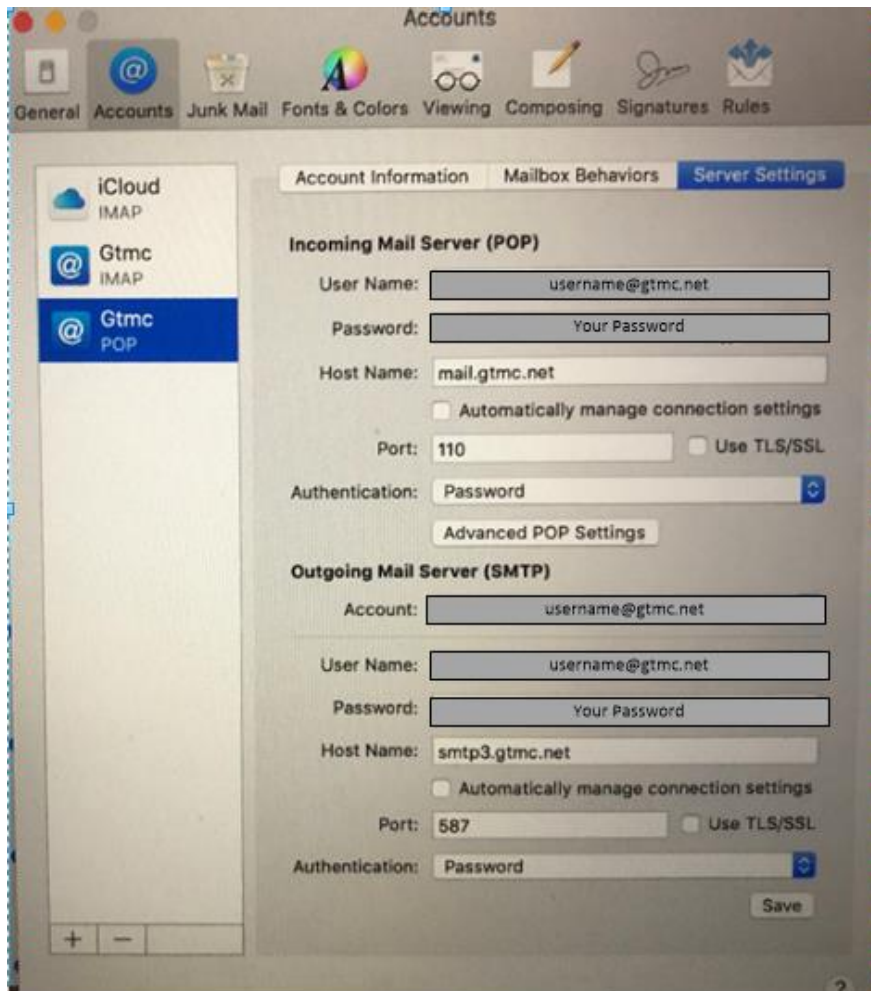

Authentication Method: Password

Example: 3-26-19 for Just change the IMAP for POP if you want.

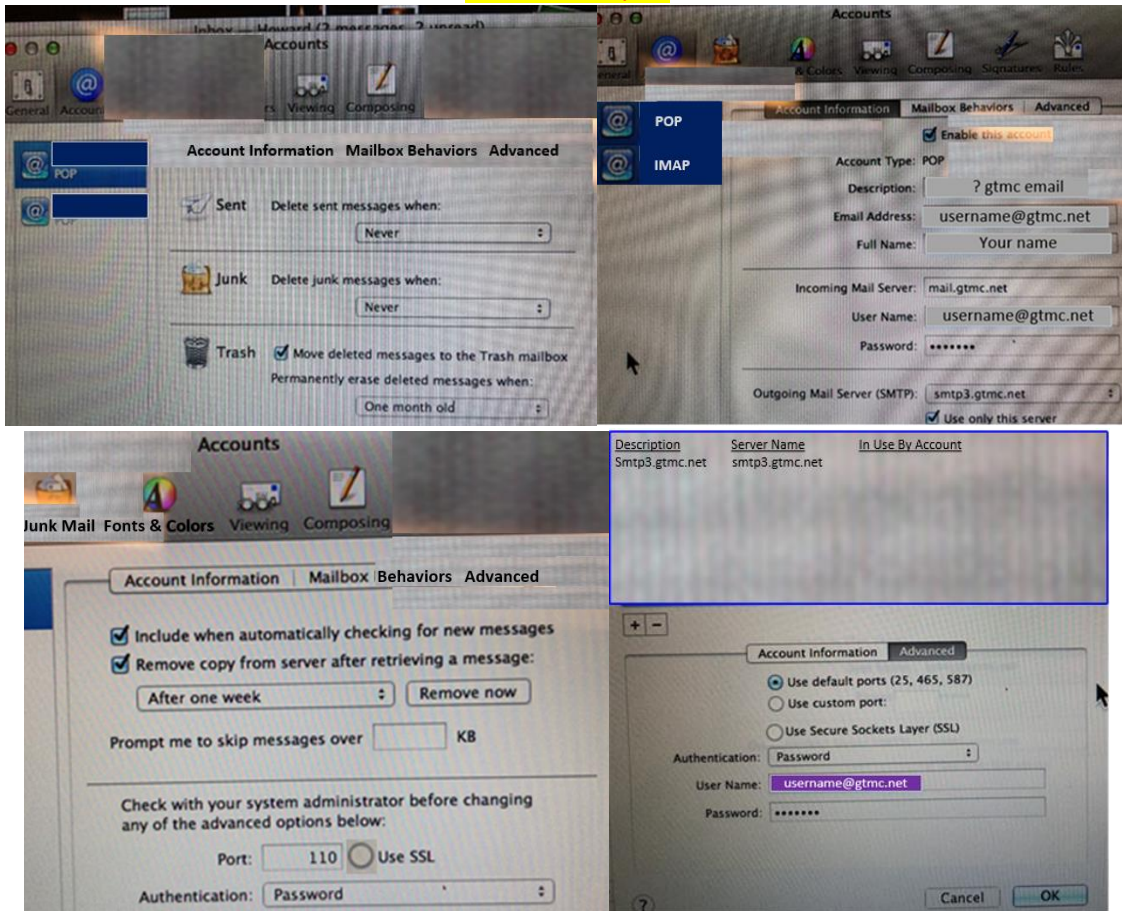

### IMAP

# POP

## OLDer Emamples

This is **smtp3.gtmc.net**. Port = 587 → Use SSL should **NOT** be checked!
