

## Setting Up Your GTMC.NET email account android example

Here are the basic settings for setting up a [@gtmc.net](mailto:username@gtmc.net) email account. Not all settings apply to all email programs or mobile devices. If these options do not work, please contact the business office. Thanks

### Incoming Mail Server: IMAP

Host Name: mail.gtmc.net

User Name: Entire email address (ex. email@gtmc.net)

Password: Enter your email password

Server Port: 143

Use SSL: NO

### Outgoing Mail Server:

Host Name: smtp3.gtmc.net

User Name: Entire email address (ex. email@gtmc.net)

Password: Enter your email password

Use SSL: NO

Server Port: 587

Authentication Method: Password

### Example: Incoming Mail settings

The screenshot shows an Android email settings dialog for incoming mail. The fields are filled with the following information:

- Username:** username@gtmc.net
- Password:** masked with seven asterisks (\*\*\*\*\*)
- Server:** mail.gtmc.net
- Port:** Port 143

At the bottom of the dialog, there are two buttons: **CANCEL** and **DONE**.
