

CommPortal Communicator is a soft phone that you can use on your PC, tablet computer or mobile smartphone.

Now you can have all the features of your VoIP desk phone on your PC, tablet computer or smartphone or all three. With CommPortal Communicator all the rich functionality of your office extension can be available to you anywhere, anytime.

Easy to use on your Mobile Phone/Tablet

- Make and receive calls on your mobile phone as though you were on your desk phone - the person you're calling sees your desk phone number and not your mobile number.
- Integrate your CommPortal Communicator contacts with your mobile phone contacts - search, call and edit any of your contacts effortlessly and keep them synchronized.
- Display your work voicemails visually on your mobile device. It looks just like your mobile phone's visual voicemail interface but these messages were left on your work voicemail - listen, delete or respond at the touch of a button. Save time, respond faster.
- Activate call forwarding or Do Not Disturb. Set up call routing choices between your desk phone, PC phone and mobile phone. Decide who can reach you and when. Now one number is enough to reach you no matter where you are.
- Set up and manage conference calls from your mobile.

Easy to use on your PC

- Make and receive audio and video calls from your PC as though you were on your desk phone – the person you're calling sees your usual desk phone number as though you were calling from your desk.
- See all your CommPortal contacts in the PC interface – search, call and edit any of your contacts effortlessly. Synchronize your contacts with Outlook too and you'll always have your contacts list up to date.
- Access your voicemails – listen, delete or respond. Notifications tell you when you have a new message. Leave and retrieve video messages too. You can easily manage your queue of messages.
- Activate call forwarding or Do Not Disturb. Set up call routing choices between your deskphone, PC phone and mobile phone. Decide who can reach you and when. Now one number is enough to reach you no matter where you are.
- Connect with your instant messaging accounts to send instant messages and to display online/away/busy status on your softphone.
- Install CommPortal Communicator on your home PC too and have access to all the features you use at work.

Fully Integrated

Your softphone is completely integrated with your hosted suite of business services. When you use your softphone to answer a call, your other phones stop ringing and if you're on your softphone and another call comes in it will go straight to voicemail recognizing that you're already on a call. You can use the same valuable services that you see from your office extension such as 4-digit dialing, auto attendant and automated call distribution. Isn't it nice to have a softphone that's ready for business?

Reliable, Secure Service.

CommPortal Communicator is fully integrated into our advanced IP voice services network with reliable performance and great support. Your sensitive information is safeguarded with our industry standard security and privacy measures. When team members can work from anywhere, CommPortal Communicator becomes an important part of your business continuity strategy too.

Re-Imagine Your Communications

CommPortal Communicator saves you time and helps you work and communicate more effectively – wherever you are. It's time to get ahead with CommPortal Communicator!
