

Easy to use mobile apps that integrate with your office phone system.

You already use features and services from the CommPortal communications productivity suite in your office.

CommPortal mobile apps make it easy to fully integrate mobile phones into your organization – no matter which network they belong to.

Missing some of your office phone features when you head out to meet customers? Always finding that your up to date contact information is in your mobile phone and not on your desktop? Use CommPortal mobile apps to save money and communicate more efficiently:

- **CommPortal Communicator Softphone for Mobile** - you can have all the features of your VoIP desk phone on your PC, tablet computer or smartphone or all three. Now you can work from anywhere.
- **CommPortal Conference for Mobile** - Invite attendees and manage audio conferences from anywhere using your mobile phone.
- **CommPortal Mobile** - Access your voicemails and faxes, manage your contacts, switch between your Easy Call Manager call handling profiles, and make Click-to-Dial calls to any of your CommPortal or phone contacts, all using your smartphone.

Set up landline calls directly from your mobile phone. Use the fixed line phone that's most convenient for you, improve call quality if coverage is poor – and save your mobile minutes too.

- **CommPortal Voicemail for BlackBerry** – Now you can easily get to your CommPortal voicemails from your BlackBerry too.

Unified Communications Available Now

Keep your contacts list synchronized in all locations where you access it, including your mobile phone.

Use one mailbox for all your messages on mobile and fixed services. See a list of your messages, listen to them and manage them – all from your mobile phone.

Use a single number and then direct calls to where you want to receive them.

CommPortal Communicator Softphone

A voice-over-internet softphone is now available on your mobile smartphone.

- Make and receive calls on your mobile phone as though you were on your desk phone – the person you're calling sees your desk phone number and not your mobile number.
- Integrate your CommPortal Communicator contacts with your mobile phone contacts – search, call and edit any of your contacts effortlessly and keep them synchronized.
- Display your work voicemails visually on your mobile device. It looks just like your mobile phone's visual voicemail interface but these messages were left on your work voicemail – listen, delete or respond at the touch of a button. Save time, respond faster.
- Activate call forwarding or Do Not Disturb. Set up call routing choices between your desk phone, PC phone and mobile phone. Decide who can reach you and when. Now one number is enough to reach you no matter where you are.
- Set up and manage conference calls from your mobile.

CommPortal Conference for Mobile

CommPortal Conference allows you to easily set up and manage conferences from your mobile. It's a low cost and complete solution capable of hosting hundreds of attendees with no reservations required and no time limits imposed.

CommPortal Voicemail for Blackberry

CommPortal Voicemail is usually associated with your desk phone. Now you can access it with a feature-rich app that runs right on your BlackBerry. It even converts your voicemails to text and lets you view faxes.

CommPortal Mobile

CommPortal Mobile lets you access many of your network services directly from your mobile phone:

- **Visual Voicemail** – Lets you listen to, and manage, your voicemails. You can see when you have a new message, see a list of all your voicemails and faxes, view your faxes and even call the person that left the message, all directly from the app.
- **Click-To-Dial** – Allows you to start a call from a nearby fixed-line phone. Now you can save your contract minutes by using a landline when one is available.
- **Easy Call Manager** – Access and change your settings so you can easily forward your landline calls to your voicemail or to another number.
- **CommPortal Contact Integration** – View and edit your contacts and make use of contacts in your phone.
